

BROKEN AUTHENTICATION ❤️

Page 14 / Skill Assessment - Broken Authentication

Skill Assessment - Broken Authentication

During our penetration test, we come across yet another web application. While the rest of the team keeps scanning the internal network for vulnerabilities in an attempt to gain an initial foothold, you are tasked with examining this web application for authentication vulnerabilities.

Find the vulnerabilities and submit the final flag using the skills we covered in the module sections to complete this module.

From past penetration tests, we know that the `rockyou.txt` wordlist has proven effective for cracking passwords.
